COLLOIDAL SOLUTIONS OF COPPER SULPHIDE: A THESIS PRESENTED TO THE FACULTY OF CHEMISTRY OF STANFORD, UNIVERSITY IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR THE DEGREE OF DOCTOR OF PHILOSOPHY (CLASSIC REPRINT)

In the following paper are given the results of a preliminary investigation of such solutions, and while the researches are by no means to be considered as complete, considerable material of interest is already in hand and given here. The composition of the sulphide content of a colloidal solution of copper sulphide is at the present time a very uncertain matter. Older investigators maintain that by the action of hydrogen sulphide on cupric compounds in the presence of water, a mixture of cupric and cuprous sulphides is formed, while Posnjak, Allen and Merwin claim that only cupric sulphide is thus formed. On the other hand, it has been observed in this laboratory that sulphide precipitated from cupric sulphate by hydrogen sulphide with exclusion of air and sealed up in an atmosphere of hydrogen sulphide shows the presence of distinct crystals of sulphur after some months standing. There seems to be at least some uncertainty as to the nature of the sulphide in the solutions used in this work, all of which were prepared from cupric compounds.
