MATHEMATICAL QUESTIONS AND SOLUTIONS, FROM THE EDUCATIONAL TIMES. VOLUME 34

To download **Mathematical Questions and Solutions, from the Educational Times. Volume 34** PDF, make sure you refer to the link under and download the ebook or get access to other information which are in conjunction with MATHEMATICAL QUESTIONS AND SOLUTIONS, FROM THE EDUCATIONAL TIMES. VOLUME 34 book.

Rarebookclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1881 edition. Excerpt: . or impossible) formed by the three links and the line of centres shall be equal to zero. Professor Sylvester states that Roberts two cases of inverse conical 3-bar motion are special cases of unicursal 3-bar motion. Solution by Samuel Roberts, M.A. Professor Cayley has shown Mathematical Society s Proceedings, Vol. IV., pp. 109, 110) that the condition specified in the question is sufficient, and notices the cases of reduction of order. To show the necessity of the condition, I consider that in general the curves described by points rigidly connected with the traversing bar, have a one-to-one correspondence, and have therefore the same deficiency. We may therefore regard a point on the traversing bar as describing the locus, and since the extremities of the links which rotate describe exceptional loci, we will suppose the describing point different from these. The locus described is evidently symmetrical about the line of centres. Moreover, since the circular points are triple points, and there are three double points on the line of centres, we must, in order to have a unicursal curve, have on this line a contact of two branches whoBe common tangent is perpendicular to the line of centres. Por we cannot have four double points ou the line of centres identically, nor one double point finitely distant from that line; since, then, there would be another double point on the other side of it. Now, taking A as origin, and the line of centres...
