Excerpt: . . . chapter vi experimental work Although much experimental work needs to be done, and will be done, on oil shale before complete scientific knowledge--chemical Need f Ex and physical--will be obtained, and perimentai such exact scientific work should be Work encouraged, yet the practical need of the industry at the present moment is the erection and operation of retort units of commercial size. It is clear from the scientific principles already known that the retorting of oil shale will be done commercially in a large number of retorts each of which has a comparatively small daily tonnage capacity. The erection of one of these retorts of commercial size successfully operated will point the way to a daily capacity of a 1, 000 tons a day by the mere duplication of the single retort. Hence, with the advent of such a retort, operated on a commercial...
