Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: .given in the following table for approximate reduction to mean daily values: --The highest and lowest temperatures in the shade, in the sun, and on the grass, were observed with the self-registering instruments described on page viii, and the index-corrections have been applied. The readings of the self-registering thermometers give the maximum and minimum temperature for the twenty-four hours succeeding the noon of the day for which they are entered. The record of rain is that given by the Beckley gauge on the ground, which is examined each day at noon. The amounts of horizontal motion of the wind, given on pages 3 to 14, are those deduced from the small anemometer mentioned on page x. The force of the wind is estimated on Beaufort's scale from 0 to 12. The amount of cloud is estimated from 0 to 10. The mean daily results on pages 3 to 14 have been deduced from three observations and can only be considered as approximate results. Daily Results from the Photographic and Self-recording Instruments. The measures directly read off from the self-recording instruments have been corrected for index-errors where necessary (see page ix), and refer to the twenty-four hours from the noon of the day given to the noon of the following day. Values of the other Meteorological elements as dependent upon the Direction of the Wind. The direction of the wind has been divided into 16 points, and the mean values of the barometer, temperature of air,...
