

A Text-Book on Retaining Walls and Masonry Dams

Filesize: 6.4 MB

Reviews

Simply no words to explain. It really is basic but shocks from the fifty percent of the ebook. I am just happy to explain how this is the finest pdf we have read within my personal life and could be the best ebook for possibly.

(Blair Monahan)

A TEXT-BOOK ON RETAINING WALLS AND MASONRY DAMS

To read **A Text-Book on Retaining Walls and Masonry Dams** PDF, you should click the web link beneath and save the file or have accessibility to additional information that are in conjunction with A TEXT-BOOK ON RETAINING WALLS AND MASONRY DAMS book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: .direction cuts the base. Let R be the resultant of P and V acting at some point T on the base. Let s represent the distance BSlt and t the distance CT. Let the point T be taken as a centre of moments, and let the lever-arm of P with and n will be known as soon as / is found. To do this the value of / is expressed in terms of /, thus: reference to it be p. The lever-arm of V is b--s--t, and that of R is zero. Then the equation of moments is $Pp = V(b-s-t)$, (46) which is the fundamental formula for the investigation of retaining walls. This may be written $Pp=Vb-Vs-Vt$, (47) which is sometimes a more convenient form for use, since Vb and Vs can be treated like single quantities. To investigate a wall, the factor of security n is to be determined. From formula (45), In this formula V is the weight of one unit in length of the wall, or, for a trapezoid, $V=frMa + S$, (51) and Vs is the moment of that weight with respect to the inner edge B of the base. By considering the trapezoid ABCD as the difference between the rectangle AaCc and the two triangles AaB and CcD, this is found, by the help of the principles of statics, to be $Vs = vh(c? + ab + F-(za + b)h \cot 6)$, . (52) and, dividing by V, the distance...
