Managing Mining Hazards: Regulation, Safety and Trust

By Neil Cunningham, Darren Sinclair

Federation Press, Australia, 2012. Paperback. Book Condition: New. 234 x 156 mm. Language: N/A. Brand New Book. Over the last 15 years the coal mining industry has achieved impressive gains in its work health and safety (WHS) performance. These are widely attributed to the development of a new WHS architecture based on structured risk management concepts and WHS management systems. Regulators too have sought to harness this approach in the development of a new form of management based regulation which holds out the promise of regulating at a distance in a manner that is resource efficient while at the same time promising better WHS outcomes than more prescriptive alternatives. However, the coal mining industry has been unable to sustain its impressive injury/fatality reduction trajectory and individual companies have been unable to apply their WHS architecture successfully across the entirety of their operations. These findings raise important questions for WHS. Based on over 150 interviews mining industry stakeholders and on in depth access to multiple mine sites within individual companies, the authors conclude that corporate systems and other tools of management-based regulation only work well when WHS is institutionalised, and when it gets into the bloodstream of the organisation at site...

Reviews

The best book i actually go through. It can be full of wisdom and knowledge Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Prof. Greg Herzog

A must buy book if you need to adding benefit. it was actually writtern quite perfectly and beneficial. You wont really feel monotony at anytime of your time (that's what catalogs are for regarding in the event you question me).
